WELCOME TO THE WORLD OF

Artistry

SWIZZLE[®]
DESIGNED WITH TRUST

ABOUT US

At Swizzle quality is the driving force behind the rapid growth of the organisation. Only those products that clear the stringent quality control checks are delivered to the customer. We also maintain the world class packing standards. The unflinching devotion and dedication of the committed team of employees has ensured many admirable achievements for the company. The fine craftsmanship and attention to detail make a unique statement about the care and time we dedicate to every fixture. The meticulous curves unique angle and mirror like polished surface of Swizzle bath fittings and bathwares are unmatched. Swizzle products have the form of functionality that excludes the quality and integrity of the material used.

Together with Swizzle we shall discover the art of creating beautiful bathrooms. We go beyond making the customers as we build relationship of understanding. Our specially trained customer care executives shall always be at your call to help meet your needs from Swizzle. So come and explore the world of ideas and artistry where you will experience unsurpassed performance and irresistible design. Don't hope for perfection expect it.

Installation

Swizzle Bath fittings and Bathwares are your prized possessions. To get the best out of these, please follow the simple guidelines given below, during the plumbing work:

- Keep the number of bends in the pipelines to the minimum as the bends in the pipeline account for loss of water pressure.
- To prevent air locking, all water supply lines should have vent pipes.
- The pipelines should travel straight and vertical as far as possible.
- Flush Valves and Flush Cocks need to be directly connected to overhead tanks through 1", 1¼" or ½ water supply lines, as required, for effective flushing. It is, therefore, most important to inform your plumber about your choice of flushing system for positioning the water supply lines correctly.
- It is preferable to use ¾" pipe for water supply to other faucets.
- It is advisable to check the concealed fittings for proper functioning before plastering and tiling.
- Please ensure that the concealed fittings are installed with the 'Arrow' mark in line with the direction of flow of water.
- The water outlet in the overhead tank should be kept at least 4" above the base level of the tank to prevent blockage due to entry of any foreign particles and other deposits.
- For hot & cold water mixers, it is advisable to supply the cold water also from the overhead tank for proper mixing and to prevent reverse flow.
- During installation, plumbing and other masonry work, the faucets should be kept covered with cloth or polythene to prevent any damage.
- The foam flow aerators need periodic cleaning to remove scale deposits and other particles.
- Do not use any strong detergents or acids for cleaning of faucets. Normal regular cleaning with a soft cloth, using solution of mild soap with water, shall eliminate chances of scale deposits and keep the faucets ever shining. We recommend usage of "Swizzle Customer Care".
- To keep the protective layer of coat intact on the gold plated and other special coated parts, prevent any damage by sharp objects.
- Faucets carry a warranty of 
- All Plastic, Acrylic, ABS, PTMT, Electrical and Electronic components carry a warranty of 
- All Sanitary products carry a warranty of  (* Excluding plastic switches.)
- Kitchen Sinks carry a  against cracks.
- Please purchase Swizzle products from company's authorized stockists only to enjoy the benefits of warranty and any after sales service, if required.
- For any assistance, please contact the nearest Swizzle stockist or the Marketing Co-ordinator.
- For all Showers of ABS & Brass carries warranty on leakage only for 

- The adornments shown are not of standard bath fittings.
- The designs are subject to change without prior notice.
- Please do specify the choice of surface finish while placing an order.
